

Embracing the vision that safety saves lives and quality saves jobs.

October, 2012

Commendation received from Wayne Tompkins, Construction Manager for the Aux Sable Midstream in Palermo North Dakota.

Joe, I just wanted to send a note of commendation to Ref Chem for a very successful shutdown this week of Oct 1 2012.

The crew that Ref Chem sent from Texas to assist in the activities here in Palermo, ND coordinated very well with the team you already had in place. Juan Gallegos, Carlos Legaretta, Fernando Paniagua, and Eleodoro Alanis drove up from Texas and were a huge asset to Aux Sables successful shutdown activities. We greatly appreciate all their contributions.

Joaquin Salgado, Jose Rodriguez, Marlon Enriquez, Paul Fowler, and Foreman Jose Dubon had everything well prepared and planned. As you know, during any shutdown, conditions and scopes change and flexibility is necessary to accomplish

the tasks required. With a limited time frame and very stringent safety requisites, it always creates unique challenges. All of the personnel involved worked very closely and professionally with the other contractors and operations to complete the required work.

All the work was completed and no safety issues were identified, meaning Aux Sable was able to get their facility back up and running on time. Thank you and we look forward to continuing our relationship for future work.

Wayne Tompkins
Construction Manager
Aux Sable Midstream,
Palermo North Dakota

Congratulations to Joe Martinez and the shutdown crew.
