

Safety First....it's the right thing to do!

March 2017

A Simple SOR Identifies A Serious Problem!

Recently in the Houston office, a report of a burnt smell was reported to the Equipment/Maintenance Department. Upon investigation, it was discovered that the electrical wiring was the issue in the third floor women's restroom!

Had this gone un-reported, the results could have been catastrophic! Because office personnel participate in the SOR program just like the field, many opportunities have been identified and resolved, helping to keep the office personnel safe.

It is important to remember that the SOR program is an effective means of communication for not only identifying hazards but also all observations. Over 1,200 Office observations turned in! (see attached) Keep up the great effort!

Always report any issues that you may find immediately!

A special Thank You! to the ladies in the Houston office for reporting this event! Great observation!

Remember, your family is counting on you!

Always report:

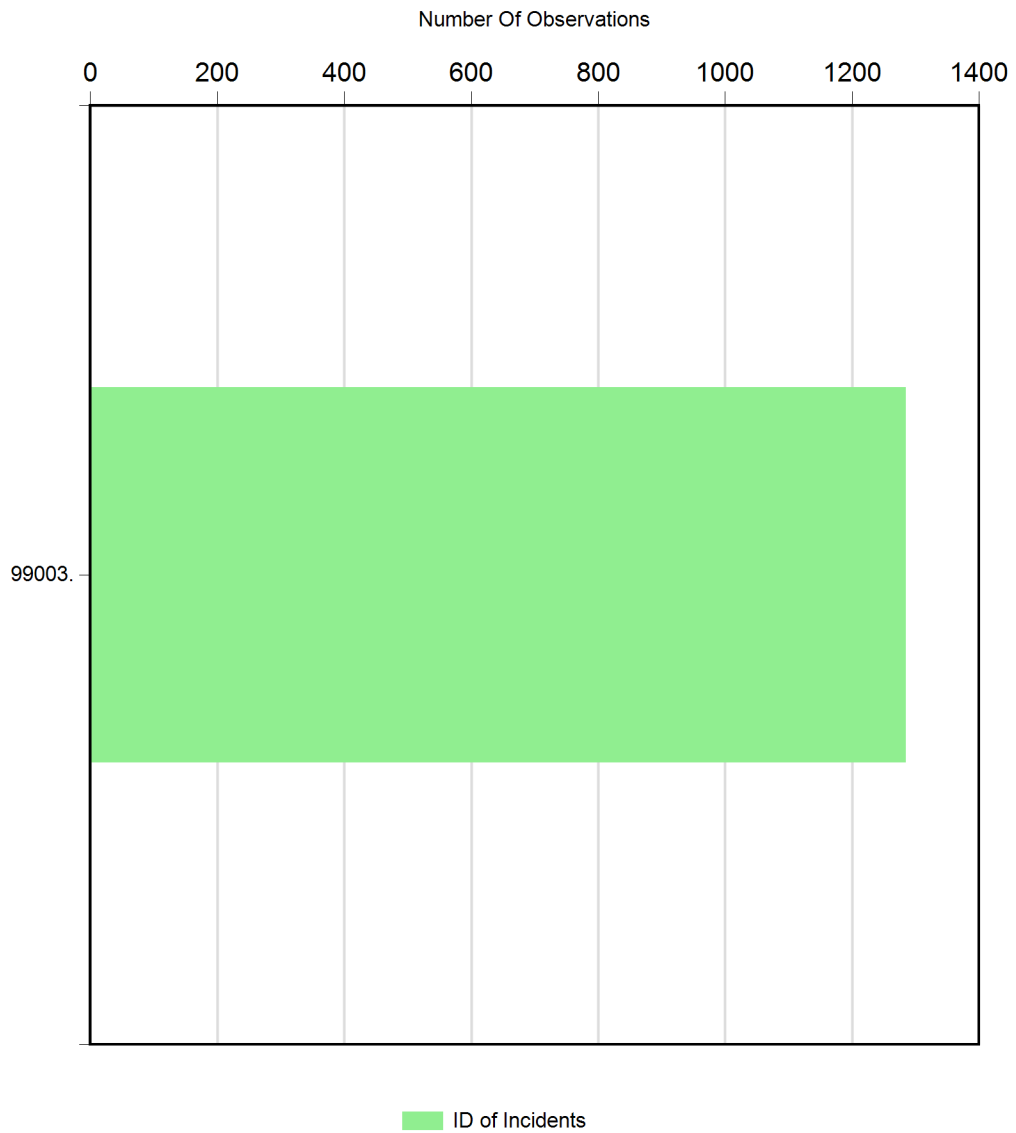

- Odd smells
- Fumes
- Smoke
- Heat inside walls
- Constantly running water
- Sparks
- Wet Floors

**See it,
own it!**

Total Observations for REF CHEM LP By Job

Beginning Date: 3/6/2016 - Ending Date: 3/6/2017
